Q-SHIELD EXTRA

Updated July'26

Q-Shield Extra is a premium exterior emulsion paint specially formulated with Pure Acrylic Technology to provide long-lasting protection under extreme tropical weather conditions. Its advanced formulation delivers superior dirt resistance, enhanced fungus and algae protection, and excellent UV durability, making it ideal for homes exposed to high humidity, rainfall, and pollution.

With its smooth matt finish and high coverage efficiency, Q-Shield Extra keeps exteriors looking clean and vibrant for longer—while meeting stringent quality standards such as SIRIM MS 134:2007. Designed for both beauty and performance, it ensures your home stays fresh and protected in any season.

Product Features:

- **Superior Dirt Resistance**
  Effectively repels surface dust, dirt, and pollution stains—maintaining cleaner walls between washes.
- **Double Protection Against Fungus & Algae**
  Advanced biocidal system offers lasting defence against biological growth, even in humid and shaded areas.
- **Tropical Weather Durability**
  Built to withstand Malaysia's challenging climate—resisting cracking, peeling, and surface degradation over time.
- **UV & Colour Protection**
  Tested to ASTM G154 (QUV-A) standards for long-term colour retention and fade resistance under intense UV exposure.
- **Smooth Matt Finish**
  Provides a modern, elegant look with reduced surface glare for refined exterior aesthetics.
- **High Coverage**
  Up to 10–12 m^2/L, with approx. 38% volume solids for better paint film build and value per litre.
- **Certified Performance**
  Complies with MS 134:2007 and awarded the Singapore Green Label, ensuring quality, safety, and environmental responsibility.

Paint Type	Product Type	Finishing	Recommended Substrate	Pack Size
Water based	Exterior	Matt	Masonry, brick, plastering substrate and fibre board	1 Litre, 5 Litres, 15 Litres, and 18 Litres

Composition

Pigment	: Mainly Titanium Dioxide, Iron Oxide, Carbon Black and Organic Pigments and Mineral Extender
Binder	: Pure Acrylic Emulsion
Thinner	: Water

Technical Data

Drying Time	: Touch Dry : 20 minutes (Dependent on temperature and humidity) : Hard Dry : 1 hour (Dependent on temperature and humidity)
Recoating Time	: 2 hours (Dependent on temperature and humidity)
Dry Film Thickness	: Around 30 µm per coat (based on substrate condition)
No. of Coats	: 2 coats
Theoretical Coverage	: 10 – 12 m^2 per litre per coat (Actual coverage is dependent on substrate condition, application method, application condition and finishing appearance)
Volume Solid	: ~ 38%

Shelf Life	: Up to 36 months in tight sealed container

Application Method

Brush / Roller	: Dilute the paint with not more than 5% of water. Preferable not dilute for best performance.

Recommended Coating System

Sealer / Primer	: 5400 Exterior Sealer / 5500 Wall Sealer / 8000 Expresskote Sealer / Acrylic 5170 Wall Sealer / Hi-Bond Wall Sealer (on powdery or skim-coated surface)	: 1 Coat
Top Coat	: Q-Shield Extra	: 2 Coats

Surface Preparation

Remove all loose, defective paint or powdery residues, loose chalk, dust, fungus, algae and foreign matter. Treat any areas affected by fungus growth with Fungicidal Wash Solution. Repair cracks, uneven surfaces with Nippon CrackREPAIR 1000 Compound or suitable exterior grade fillers. Smoothen the filler areas with sand paper. Surfaces to be painted must be cleaned thoroughly and dry, it must be free from dirt, grease and other foreign matters. Allow all surfaces to dry completely prior to painting. Avoid painting when the moisture content and alkalinity of the walls are still high. (Recommended painting specification requires the moisture content of the walls to be below 16% measured by protimeter and alkalinity of the walls to be below pH9.) Spot prime with Nippon Paint Exterior Wall Sealer.

Cleaning

Clean up equipment with water immediately after use.

Certificates

Complies to Singapore Green Label, MS-SIRIM

Certified by: ***Singapore Environment Council (SEC) and SIRIM QAS***

Tests

1. **ASTM D3719** on Dirt Pick-Up Resistance by Natural Weathering, tested in-house
2. **ASTM G154** on QUV-A Colour Retention Resistance, tested in-house
3. **ASTM D2486** on Wet Scrub Resistance, tested in-house
4. **MS 134: 2007** on Specification for Latex Emulsion Paint for Exterior and Interior Use
5. **SGLS Category 032** on Singapore Green Label

Safety Precautions

- Keep container tightly closed and keep out of reach children or away from food and drink.
- Ensure good ventilation during application and drying.
- When applying paint, it is advisable to wear eye protection.
- In case of contact with eye, rinse with plenty of water immediately and seek medical advice.
- Remove splashes from skin by using soap or water.
- Paint must always be stored in a cool place.
- When transporting paint, care must be taken. Always keep container in a secure upright position.

Environment Precautions

- Dispose off any paint waste in accordance with the appropriate Environment Quality Regulations.

ENVIRONMENTAL CARE

- Dispose of paint waste in accordance with Environmental Quality Regulations; do not pour liquid paint into drains or soil, as it is a regulated scheduled waste, and ensure proper disposal via licensed facilities or by allowing paint to dry

completely before discarding.

- Recycle and reuse the plastic paint pail by scraping out all remaining paint for future use (e.g., transferring to a smaller container for touch-up or repainting), allowing any residual paint to dry, removing the dried paint film using a scraper and disposing of it as general waste, washing the empty pail with water, and then reusing the clean pail for household purposes or sending it to an approved recycling centre.

Note

* Theoretical Coverage is based on a mathematical formula

$$\left[\frac{Volume\ Solid\ \%\ x\ 10}{Dry\ Film\ Thickness}\right] = m^2/lit/coat$$

and does not consider LOSS FACTORS.
Variables like porosity of substrate, application method, dilution ratio, dry film thickness, opacity and so on will affect the loss factor and can vary from 30% - 50% or even more.
