

**CMI® RENDER SP**
*Updated June'23*

**DESCRIPTION**

**CMI® Render SP** is an environmentally friendly, premium quality polymer modified cement-sand plaster / render for application on block walls, brick walls and concrete substrates at internal and external application. It is specifically recommended for use as a fine textured sponge finishing for external walls and ceiling to provide an aesthetically pleasant and level wall surface. It is certified with Singapore Green Label by Singapore Environment Council.

**CMI® Render SP** have a characteristic of better adhesion, flexural strength and abrasion resistance with improved water and weather resistance for exterior finishing application. The use of **CMI® Render SP** will eliminates the need for key coats or primer normally required for external wall application or onto smooth concrete surfaces.

**USES**

- Plaster / Render for application onto block walls, brick walls and concrete substrates.
- Can also be used for levelling and patching works for internal and external application.
- IT SHOULD NOT BE USE ON PAINTED SURFACES.

**ADVANTAGES**

- Premixed with good and consistent quality.
- User friendly, just need to mix with water and apply.
- Pre-packed, complementing IBS construction to achieve good construction quality, less labour intensive.
- Good workability and high adhesion with excellent shrinkage cracks control.
- High durability with good weather resistance.
- Eco-friendly cementitious plaster / render, certified with Singapore Green Label by Singapore Environment Council.

Product Type	Product Code	Pack Size	Finishing	Color	Substrate
Plaster / Render	Thin Bed (081 SP)	40kg	Semi-smooth texture	Grey	Block / Concrete / Brick
	Medium Bed (082 SP)	40kg	Semi-coarse texture		
	Thick Bed (083 SP)	40kg	Coarse texture		

**Technical Data**

CMI® Render	Thin Bed (081 SP)	Medium Bed (082 SP)	Thick Bed (083 SP)
Appearance	Grey Powder	Grey Powder	Grey Powder
Bond Strength @ 28 days	≥ 0.75 N/mm <sup>2</sup>	≥ 0.75 N/mm <sup>2</sup>	≥ 0.75 N/mm <sup>2</sup>
Wet Density	1800 – 1900 kg/m <sup>3</sup>	1800 – 1900 kg/m <sup>3</sup>	1800 – 1900 kg/m <sup>3</sup>
Dry Density	1650 – 1750 kg/m <sup>3</sup>	1650 – 1750 kg/m <sup>3</sup>	1650 – 1750 kg/m <sup>3</sup>
Pot Life @ 30°C	Approx. 1 hour	Approx. 1 hour	Approx. 1 hour
Max. Aggregate Size	1mm	1.5mm	3mm
Recommended Thickness	3 – 6mm per coat	5 – 10mm per coat	10 – 20mm per coat
Mixing Ratio	Approx. 17% water on dry material	Approx. 17% water on dry material	Approx. 17% water on dry material

**Recommended Total Coating & Construction System**
**SEMI-EXPOSED / EXTERIOR WALL SYSTEM**
**(I) Block Wall / Concrete Wall**

TYPES	PRODUCT NAME	NOMINAL THICKNESS
Surface enhancement* - <i>Optional</i>	: CMI® Plastering Bonding Agent 370	: 1 coat
<b>Plaster / Render</b>	: <b>CMI® Render 081 SP / 082 SP / 083 SP</b>	: <b>10-12mm</b>
Skim Coat (Top Coat) - <i>Optional</i>	: CMI® Base Mortar Grey EX981	: 3-5mm
Paint (Sealer/Primer)	: Nippon Paint Exterior Sealer Range	: 1 coat
Paint (Finishing Coat)	: Nippon Paint Exterior Finishing Range	: 2 coats

**Note:**

- Kindly refer to the respective technical datasheet for more information.
- For areas not specified, please consult **Nippon Paint / CMI®** Technical Representatives for more information.

**Surface Preparation**

All surfaces must be sound, clean and free from dirt, dust, grease and other contaminants which will inhibit proper bonding. Damp the substrate for dry or high absorbing substrates prior to application of **CMI® Render SP**. For application on smooth concrete substrates, a primer coat is recommended for roughening of the receiving surface prior to plastering.

**Mixing**

Add 6.5 - 7.0 liters of clean water for 40 kg **CMI® Render SP** (Do not add cement or lime into the mixture). Mix thoroughly for 3-5 minutes using mechanical mixer until the homogenous paste is achieved and lump-free. Re-mix the mixture is left unattended for more than 30 minutes.

**Application**

Apply the mixture onto receiving surface using steel trowel. If more than one coat is required due to surface flatness, allow the underlying coat to achieve partial cure or touch dry before applying the subsequent coat. For external walls, it can be sponged in circular motion to achieve fine textured finishing after the final coat partially set.

It is recommended to cure with water spray for the first 2 days after application in hot and dry conditions to allow for proper curing.

**Coverage**

CMI® Render	Consumption
• <b>Thin Bed (081 SP)</b>	Approx. 1.5 kg/m <sup>2</sup> / mm
• <b>Medium Bed (082 SP)</b>	Approx. 1.6 kg/m <sup>2</sup> / mm
• <b>Thick Bed (083 SP)</b>	Approx. 1.8 kg/m <sup>2</sup> / mm

**Cleaning**

Clean up equipment with water immediately after use.

**Safety Precautions**

- Wash thoroughly after handling. Do not eat, drink or smoke when using this product.
- Wear protective gloves/protective clothing/eye protection/face protection.
- Avoid inhaling dust during handling or mixing of products.
- Use only in well-ventilated area.
- In case of inadequate ventilation wear respiratory protection. In case inhaled, remove patient to fresh air and allow to rest.

- In case swallowed, do not induce vomiting. Rinse mouth clear with water and drink two glasses of water.
- In case contact with eye, immediately rinse with plenty of water and seek medical advice.
- Remove splashes from skin by using soap or water.
- Products must always be stored in a cool, dry and well-ventilated area.
- When transporting products, care must be taken. Always keep products dry and avoid generating or accumulating dusts during handling.
- Disposal of product should always comply with local and national regulations.

**Shelf Life & Storage**

Six (6) months when stored in cool and dry condition.

**Note**
